2016 to current

## EDUCATION

### Rajasthan Technical University— B. TECH

JULY 2011 - JUNE 2014

Computer Science and Engineering

### BTER

JULY 2008 - JUNE 2011

Computer Science and Engineering

## PROFILE

### Github -

<https://github.com/manishkumar011193>

Recently created a new package to resolve issues of “inversion of control” in javascript/typescript and published it on npm and github named as “dependencyjs”

### StackOverflow

<https://stackoverflow.com/users/4510224/manishkumar>

Actively helping others to resolve problems on stack overflow.

## PROJECTS

### Ekolo(Application like Uber)

Tech Stack – React-Native, ReactJs, Nodejs, Dotnet core

Roles – Architect, Leading team, Development and Design

### Cartos (Dec 2016- March 2019)

Tech Stack - NodeJS, Javascript, Typescript, Java, Python, Dotnet Core, Jenkins, MongoDB, MySql

Role – Leading Team, Client Interaction, Design & Development.

This is a product developed by InTimeTec. Cartos is a complete solution for managed printing solution. This is designed to help big companies like HP, Canon, Sharp, konica minolta to manage their assets (like printer, plotters etc). It helps them to virtually map all the assets to site, building, and floor.

### Credit Interlink (Credit Suite) (July 2014- Sept 2016)(Dec 2016-March 2019)

Tech Stack – Asp.Net, MVC, C#, MS SQL, JQuery, Window Services, Web Services, ADO.NET, Entity Framework

Role – Leading Team, Client Interaction, Design & Development.

This product is being used by mortgage industry. This help banks/Loan Providers to run background check on borrower. This product is currently used only in USA. With help of this product, loan officers can get borrower’s credit history, employment details, income tax transcripts, criminal records etc. It helps them to make a better discussion to grant a loan.

### Microsoft’s Sales BI tool(Sept 2016- Dec 2016)

Tech Stack - C#, .Net 4.5,4.6, Visual Studio, SharePoint, ADO.NET, and SQL Server 2014.

Role –Client Interaction, Design & Development.

This application is used by Microsoft to maintain highly confidential sales data.
